

# Frequently Asked Questions

**Q. What is excessive sweating?**

A. Sweating is a normal body function that helps maintain a body temperature of around 98 degrees Fahrenheit through evaporation. Excessive sweating occurs when the amount of sweat largely exceeds the quantity required for thermoregulation. Common areas affected are underarms, face, hands and feet.

**Q. How is Hydrosal Professional different from any regular antiperspirant?**

A. Hydrosal Professional is a specially formulated gel developed to treat individuals with excessive sweating. Its unique formula contains ingredients not found in regular antiperspirants which enhances efficacy while maintaining a high level of tolerability.

**Q. Can I use Hydrosal Professional even if I don't experience excessive sweating?**

A. Yes, you can. Hydrosal Professional can be used for situational sweating. It can provide extra protection for those moments in life where your perspiration level could increase... such as hot weather, exams, presentations, first date, etc.

**Q. What quantity should be applied?**

A. Hydrosal Professional should be applied sparingly. As an example, a pea-sized drop spread evenly should be enough per underarm.

**Q. Why should Hydrosal Professional be applied at bedtime?**

A. The sweating mechanism slows down at bedtime, allowing the product to better penetrate and reducing risk of irritation.

**Q. Will Hydrosal Professional still be effective if I wash my underarm in the morning?**

A. You do not need to wash Hydrosal Professional off in the morning but if you shower or bathe, the efficacy will remain throughout the day.

**Q. Will I still need to use my regular antiperspirant/deodorant while using Hydrosal Professional?**

A. In most cases, Hydrosal Professional will be all you need to control sweating and odors.

**Q. How long will a bottle of Hydrosal Professional last?**

A. Hydrosal Professional comes in a convenient 1.7 fl oz (50 mL) size that lasts at least 6 months when applied sparingly 3 times a week.

**Q. Where can I find more information about excessive sweating?**

A. For more information you can visit [www.sweathelp.org](http://www.sweathelp.org).

# Hydrosal® PROFESSIONAL

# Take Control of Excessive Sweating

# About Hydrosal<sup>®</sup> PROFESSIONAL

## Hydrosal<sup>®</sup> Professional is not a regular antiperspirant!

Developed by a dermatologist, Hydrosal<sup>®</sup> Professional is a unique formula in a proprietary gel base and is specifically formulated for individuals with excessive sweating. Hydrosal<sup>®</sup> Professional contains 15% aluminum chloride hexahydrate in a 2% salicylic acid gel base. Aluminum chloride hexahydrate is proven to be more effective than other aluminum salts typically used in antiperspirants. Salicylic acid enhances absorption of the aluminum chloride and has astringent and antiperspirant properties of its own.

## Hydrosal<sup>®</sup> Professional is formulated to minimize irritation.

Studies have demonstrated that an alcohol gel is better tolerated than an alcohol solution resulting in less irritation. Clinical studies have also shown that patients preferred Hydrosal<sup>®</sup> Professional over other high strength antiperspirants.

## Easy to use.

Wash and dry area to be treated. Dispense a pea-sized amount of Hydrosal<sup>®</sup> Professional antiperspirant gel. Apply to the affected area for seven consecutive nights at bedtime. Afterward, use as often as necessary or as directed by your healthcare professional.

## The Facts<sup>\*</sup>

- Excessive sweating affects almost 9 million Americans
- Can occur at any age
- Often familial
- Adversely affects work and social activities

## Testimonials

*"I would like to bring to your attention, that I have tried the product that my doctor has recommended Hydrosal. For the past thirty years I suffered in complete embarrassment, severe sweating from the forehead, and other body areas. This sweating was triggered by nervousness on my confrontation of an individual that I met, or dealt with on first time basis. The more I realized I was sweating, the more severe it became. It was devastating for me, and I spoke to many doctors with really no feedback from them. Meeting Dr. Benohanian was for me a miracle; Life has given me a second chance. Hydrosal is amazing and very easy to apply with almost 90 to 95 % effective rate for me. Keep up the good work and create more beneficial products like Hydrosal! Thanks again."*

**Alan, Plattsburgh**

*"Thank you, Thank you, Thank you! I have suffered from excessive sweating as long as I can remember... the last 10 years specifically, have been the worst. I was ready to have surgery to have my sweat glands removed in my arm pits as nothing seemed to work. I tried Drysol but couldn't stand the pain every day during the first week. I considered botox but wasn't really thrilled about having poison put in my body, or about having 30 needles put in each arm pit. My doctor called me 2 weeks ago to tell me about an article that she read in the paper about Hydrosal Professional. After the first 2 days it started to sting a little when I applied the gel, but I got over that fast when I realized that it was working. I just finished my 7 days and have not sweat at all in 5 days. I am absolutely thrilled and hope that others will try this too. I realize that sweating is an embarrassing issue and I myself didn't talk about it much with other people, but it's kind of obvious when you can see it through your clothing. Since I no longer have this problem I have been telling my friends and family about it because I know how difficult dealing with this issue is and how much it affects your life. I am surprised to hear how many other people have excessive sweating also. Thanks again and I will continue to spread knowledge about this great product!"*

**Jennifer, Wisconsin**

*"Before Hydrosal I would always have to worry about sweat stains in the shirts I used to wear. Now after using Hydrosal I can wear any color I want in any fabric. Hydrosal worked fast too; after 2 days I could already see the results – no more sweat stains. I highly recommend Hydrosal to anybody who has had it with those extremely embarrassing sweat stains and doesn't want to worry about them anymore!"*

**Julia, New York**
